

II Semester

ARCHITECTURAL DESIGN - II			
Course Code	21ARC21	CIE Marks	100
Teaching Hours/Week (L:T:P: S)	0:0:0:7	SEE Marks(VIVA)	100
Total Hours of Pedagogy	84	Total Marks	200
Credits	07	Exam Hours	-
<p>Course objectives: <i>To develop the ability to generate solutions to spatial constructs, i.e., space and form which integrate principles of design with functional requirements by emphasizing the study of variables like light, movement, transformation, scale, structure & skin., physical constraints and cultural context, either urban or rural, Formal and informal housing.</i> <i>To develop the ability to translate abstract principles of design into architectural solutions for simple problems.</i></p>			
<p>Teaching-Learning Process (General Instructions) These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> 4) The contents of the courses shall be taught in an application-oriented manner on a scientific and design basis. The course contents shall be taught and learned in lectures, seminars, labs or workshops, studio exercises and design projects, etc. 5) In-studio exercises the teachers shall take the lead to provide tasks and offer guidance for solutions finding. The students shall work either individually or in groups. 6) In design studios, the students contribute to the processing, analysis and solving of problems of direct professional practice, attended by faculty(s) entitled to conduct the studio and examine. The results shall be defended through drawings; models and reports and evaluated through periodic assessment and finally by a jury or panel, and finally, evaluated through periodic assessment and an end semester examination or viva voce. 			
<p>We inhabit and function in space, both the manmade and the natural i.e., "a life spent within an enclosure". These enclosures have functional and cultural meanings, are symbols of abstract ideas of that period in time.</p> <p><i>"Architecture is about giving form to the places where people live. It is not more complicated than that but also not simpler than that." - Alejandro Aravena</i></p> <p><i>"Architecture is both an art and a practical pursuit, and the profession has always been divided between those who emphasize the art, that is pure design, and those who give priority to the practical." - Paul Goldberger</i></p> <p><i>"Architecture is used by political leaders to seduce, to impress, and to intimidate." - Deyan Sudjic</i></p>			
Module-1			
<i>To relearn the "principles of Design" and anthropometric requirements of space planning,</i>			
Teaching-Learning Process	<ul style="list-style-type: none"> • Observe daily activities with respect to functional spaces in plan and section • Study of the relationship between human body and the built environment understanding usage, spatial and thermal comfort. 		
Module-2			

<p><i>Introduction to “Nature of Space”:</i></p> <ul style="list-style-type: none"> • <i>Understanding the notions of PLACE: A “boundary”, a “center” and a “spirit”, PATH: A “way” and a “goal”, DOMAIN: A conglomeration of paths and goals that forms a “whole” with its own “identity”,</i> • <i>Understanding the notions of “Enclosure, Ambiguity, and Transparency”, “Spatial Context in formal and informal built environment. - open, closed, transition spaces”, “cultural context – inclusion, exclusion, spatial segregation”,</i> • <i>Culture & Design: Understanding social attitudes to Built-form: extroverted/introverted, formal/informal, typical/individual, simple/labyrinthine, contiguous/isolated etc.</i> 	
Teaching-Learning Process	<ul style="list-style-type: none"> • . Mapping of one’s journey from home to studio/of the campus/of a Neighbourhood. Explore issues of movement, navigation, circulation, direction and discovery. Explore issues of representation, scale, starting point, orientation, landmarks, and imagery.
Module-3	
<p><i>Introduction to “Poetics of Space” :</i></p> <ul style="list-style-type: none"> • <i>light, movement, transformation, scale, structure and skin,</i> • <i>key tools for learning : text / language as a tool; emotion, cultural, climatic, eg.- contemplative / severe / dramatic / minimalist / natural / organic / contemporary / traditional / etc.,</i> 	
Teaching-Learning Process	<ul style="list-style-type: none"> • Observation & study • Presentation of case studies based on literature survey & field visit. • Study models, Sketches and Drawings of study models - plans and sections (suitable scale) using a mono functional space.
Module-4	
<p><i>Understanding the role of Physical Context - terrain, materials, structure, etc.,</i></p>	
Teaching-Learning Process	<ul style="list-style-type: none"> • Hands-on Design exercise – creation of a simple design in which form is distinct from structure and creation of a simple design in which form is integral with structure. • Presentation of case studies based on literature survey & field visit. • Study models, Sketches and Drawings of study models - plans and sections (suitable scale) using a mono functional space.
Module-5	
<p>Design process to test the learning of the semester using a multifunctional program to incorporate “nature of space”, “poetics of space” and “physical constraints”,</p> <ul style="list-style-type: none"> • <i>Generation of a design brief for a multifunctional program, generation of areas based on human activity and anthropometric data,</i> • <i>Selection a of suitable site,</i> • <i>Idea generation, design development, & design drawings,</i> • <i>Eg. - A House for self, Guest House, Farm house, Villa, Container house, Courtyard house, Tree house, house in an informal settlement etc.</i> 	
Teaching-Learning Process	<ul style="list-style-type: none"> • Presentation of case studies based on literature survey & field visit. • A comparative analysis of a formal design house and an informal (self-help) house on analogy of space, function, modern and vernacular materials used, etc.

- Submission will include Idea generation, Study models, Sketches to achieve the desired result, development drawings and a set of plans, sections and elevations & model to suitable scale.

Course outcome (Course Skill Set)

At the end of the course the student will be equipped to understand the requirements of a multifunctional programs with respect to aspects of locating the design program on site viz a vie light, movement, etc.. The student will also be equipped to understand how to start a settlement study.

Assessment Details (both CIE and SEE)

(methods of CIE need to be defined topic wise i.e.- Studio discussions, Reviews, Time problems, test, Seminar or micro project)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 50% marks individually both in CIE and 40 % marks in SEE to pass. Semester End Exam (SEE) is conducted for 100 marks (Viva-voce). Based on this grading will be awarded. The student shall secure the 50% maximum marks for the course (CIE+SEE) for passing in the course.

Continuous Internal Evaluation:

Methods suggested:

3. Studio discussions, Reviews, Time problems, CIE tests, Seminar or micro project, Quiz, report writing etc.
4. The class teacher has to decide the topic for the Design and Seminars if any, in the beginning only. The teacher has to announce the methods of CIE for the subject in advance in writing.

Semester End Examination:

4. The student needs to submit his/her works done throughout the semester, including rough sheets for the Viva examination, at least one day prior to the Viva work examination to the course teacher/coordinator.
5. The Viva-voce will be evaluated by an external teacher appointed by the University along with Course teacher or an internal examiner.

The SEE marks list generated is to be signed by both internal and external examiners and submitted to VTU in the sealed cover through the Principal of the institution.

Suggested Learning Resources:

Books

1. Alain de Botton, " How Proust Can Change your life", Picador, 1997.
2. Alain de Botton, " The Architecture of Happiness", Sep. 2006, Vintage Books.
3. Alan Fletcher, " The art of looking sideways", Phaidon Press, 2001
4. Anthony Di Mari and Nora Yoo, " Operative Design: A Catalogue of Spatial Verbs", 2012, BIS Publishers.
5. Anthony Di Mari, " Conditional Design: An Introduction to Elemental Architecture", 2014, 1st Edition, Thames & Hudson.
6. Bruno Munari, "Design as Art", Penguin UK, 25-Sep-2008
7. Charles George Ramsey and Harold Sleeper, " Architectural Graphic Standards", 1992, Wiley
8. Christopher Alexander, "Notes on the Synthesis of Form", 1964, Harvard University Press.
9. Debkumar Chakrabarti, " Indian Anthropometric Dimensions For Ergonomic Design Practice", 1997, National Institute of Design.
10. François Blanciak, " Site less: 1001 Building Forms", 2008, MIT Press
11. Frank Ching, James F. Eckler, "Introduction to Architecture", 2012, John Wiley & Sons, US

12. Frank D.K. Ching, " Architecture: Form, Space, and Order", 4th Edition, Sep. 2014, John Wiley & Sons
13. Herman Hertzberger, "Lessons for Students in Architecture", 2005, 010 Publishers
14. Italo Calvino, " Invisible Cities", Harcourt Brace Jovanovich (May 3, 1978)
15. John Berger, " Way of Seeing", 1972, Penguin, UK
16. John Hancock Callender, " Time-Saver Standards for Architectural Design Data", 1982, McGraw-Hill
17. Michael Pause and Roger H. Clark, " Precedents in Architecture: Analytic Diagrams, Formative Ideas, and Partis", Van Nostrand Reinhold, 1985
18. Paul Jacques Grillo, " Form, Function and Design", 1975 , Dover Publications, New York
19. Paul Jacques Grillo, " What is Design ?", 1960, P. Theobald
20. Paul Lewis, Marc Tsurumaki, David J. Lewis, "Manual of Section", Princeton Architectural Press, 2016
21. Peter H. Reynolds, " The Dot", 2013, Candlewick Press
22. Philip Jodidio, "Tree houses. Fairy tale castles in the air", 2012, Taschen
23. Robert W. Gill, "Rendering with Pen and Ink", Van Nostrand Reinhold (1 June 1984)
24. Tom Alphin, "The LEGO Architect", 2015, No Starch Press

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Seminar by students on their field trips to dwellings in formal and vernacular settlements.

II Semester

Materials and Methods in Building Construction-II			
Course Code	21ARC22	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	1:0:0:3	SEE Marks(VIVA)	50
Total Hours of Pedagogy	50	Total Marks	100
Credits	4	Exam Hours	-
Course objectives:			
<ul style="list-style-type: none"> To understand Roofing systems using Timber, Steel Truss and Concrete. Cement, Steel and Reinforced Concrete. 			
Teaching-Learning Process (General Instructions)			
These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> Studio works by students, lecture by faculty on materials using teaching aids Visits to construction yard/site to understand materials and methods of construction. Seminar by students on their learning. 			
Module-1			
1) Timber Roof – Lean to roof, Collared Roof, King post roof, Queen Post Roof; details of joinery.			
2) Steel Roof – Types of Steel Truss Roofs and method of construction.			
Teaching-Learning Process	<ol style="list-style-type: none"> Studio work on different types and shapes of trusses used in timber and Steel. Details of sections and sizes of principle rafters, struts, perlines, etc., used in steel and timber trusses for different spans. Site visit, documentation, studio presentation by students on their learning. 		
Module-2			
3) Cement: Types, applications, Tests - laboratory and field.			
4) Steel: Properties and uses of reinforced steel.			
5) Concrete: Ingredients, grades, admixtures, properties, production, mix, proportioning and placing of concrete.			
Teaching-Learning Process	<ol style="list-style-type: none"> Understanding how cement, steel and concrete are tested in field and in laboratory. Exploring the properties, uses and application of cement, steel and concrete in a typical building and in special applications. Field visit to understand different materials used in concrete and quality parameters of concrete before and after concrete casting. 		
Module-3			
6) Reinforced Cement Concrete: Form work, placing, and compaction, curing of concrete, sampling and testing of concrete. Construction joints, expansion joints, finish in concrete, chemical admixtures. Advantages and disadvantages with respect to thermal properties and impact on life cycle of a building.			
7) RCC Foundations (Isolated footing) and Columns (Square and Round). Raft foundations, Grillage foundations and combined footing.			
Teaching-Learning Process	<ol style="list-style-type: none"> Basics of form work with conventional and modern materials used in all R C C works. Understanding different grades of Concrete in R C C (M-15, M-20, M- 25) PPT/videos /field visits on different types of foundation. 		
Module-4			
8) Staircase: Anthropometry of stairs, types of Staircases.			
9) Timber Stairs: Single and Double Stringer stairs: construction methods and joinery.			
10) RCC Stairs: Waist slab, folded plate, stringer beam stairs, precast stairs: construction methods and			

joinery.	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Studio work on different types and shapes of staircases built in Timber, Steel and Concrete. 2. Analysing details in joinery and techniques of construction of staircase
Module-5	
<p>11) Steel Stairs: Stringer stairs, Folded Type, Spiral stairs, Fire escape stairs: construction methods and joinery.</p> <p>12) Composite Stairs: Brick/stone, Steel/Timber, Concrete/wood, steel/ glass: construction methods and joinery.</p>	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Understanding the purpose and uses of steel and composite staircases. 2. Analysing construction methods and joinery details. 3. PPT/videos presentation on different types of steel and composite stairs.
<p>Course outcome (Course Skill Set)</p> <p>At the end of the course, the students would be able to:</p> <ol style="list-style-type: none"> 1. Appreciate the procedure involved and various materials that can be used in construction of roofs, foundations and staircases with greater understanding of details involved in joinery. 2. Compare various materials and their inherent properties 	
<p>Assessment Details (both CIE and SEE)</p> <p>(methods of CIE need to be define topic wise i.e.- Submission of construction drawing sheets, Journal of materials, Multiple Choice Question, Quizzes, Open book test, Seminar or micro project)</p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 50% marks individually both in CIE and 40% marks in SEE to pass. The average score of CIE + SEE shall be not less than 50% maximum marks of the course. Semester End Exam (SEE) is conducted for 50 marks (Viva-voce). Based on this grading will be awarded.</p> <p>Continuous Internal Evaluation:</p> <ol style="list-style-type: none"> 3. Methods suggested: Submission of Construction sheets, Journal of Materials, Test, Written Quiz, Seminar, report writing etc. 4. The class teacher has to decide the topics for the test, Written Quiz, and Seminar. In the beginning, only the teacher has to announce the methods of CIE for the subject. <p>Semester End Examination:</p> <ol style="list-style-type: none"> 4. The student need to submit his/her works done throughout the semester, including rough sheets for Term work examination, atleast one day prior to Viva work examination to the course teacher/coordinator. 5. The work will be evaluated by an external teacher appointed by the University along with Course teacher or an internal examiner. 6. The SEE mark list generated is to be signed by both internal and external examiners and submitted to VTU in sealed cover through the Principal of the institution. 	
<p>Suggested Learning Resources:</p> <p>Books</p> <ol style="list-style-type: none"> 1) Francis K Ching 'Building construction', Wiley; 5 edition (February 17, 2014) 2) R. Barry, "Construction of Buildings" Vol 1., 1999 by Wiley-Blackwell 3) Roy Chudley, "Construction Technology", 3rd Edition, Longman, 1999 4) W.B. Mckay, "Building Construction", Donhead, 2005

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Visit to construction site for observation of materials used and methods adopted in building construction.
- Study of vernacular materials used in different climatic zones and their thermal properties.
- Visit to material testing labs to understand various properties of building materials, and observe the testing methods.
- Discuss with the faculty/experts on life cycle and environmental impact of construction materials

II Semester

Architectural Graphics-II			
Course Code	21ARC23	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:0:4	SEE Marks(Term Work)	50
Total Hours of Pedagogy	48	Total Marks`	100
Credits	4	Exam Hours	-
Course objectives: <i>To develop visual communication and representation skills and methods of presentation of spatial design through 3D drawing techniques.</i>			
Teaching-Learning Process (General Instructions) These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes. <ol style="list-style-type: none"> 3. The students need to do the assignments in the studios. 1. Use of Video animation for easy understanding of various drawings 			
Module-1			
<ol style="list-style-type: none"> 1. 3D-Projections: exercises in 3D representation of exploded isometric and axonometric views of objects, furniture and built forms. 2. Development of surfaces for architectural roof forms, built enclosures and envelopes such as tents, upholstery and exercises of application to develop the paper and cardboard models. 			
Teaching-Learning Process	<ol style="list-style-type: none"> 3. The students need to do the discussions on assignments in the studios. 4. Explore videos in various websites using animation of geometrical drawings. 5. A consolidated portfolio containing exercises related to each of the above topics are to be submitted for term work examination. 		
Module-2			
<ol style="list-style-type: none"> 3. Section of geometrical solids and construction of true shapes. 4. Interpenetration of geometric solids, combination of different forms in architectural compositions. Ex: Projecting towers of vertical circulation on building facades, chimney over sloping roofs and projecting canopies and balconies on facades and dormer windows. 			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. The students need to do the discussions on assignments in the studios. 2. Explore videos in various websites using animation of geometrical drawings. 3. A consolidated portfolio containing exercises related to each of the above topics are to be submitted for term work examination. 		
Module-3			
<ol style="list-style-type: none"> 5. Introduction to perspective drawing: Its importance in architectural drawings, principles of perspective drawing, visual perceptions and its limitations. Exercises of observation, recording and representing the visual effects of depth, diminution and vanishing of built forms and understanding the methods of perspective projection. 6. Studies in perspective drawing: Understanding the importance and purpose of picture plane, station point, vanishing point, ground level, eye level, cone of vision and central line of vision - their variations and resultant effects. 			
Teaching-Learning	<ol style="list-style-type: none"> 1. The students need to do the discussions on assignments in the studios. 2. Explore videos in various websites using animation of geometrical drawings. 		

Process	A consolidated portfolio containing exercises related to each of the above topics are to be submitted for term work examination.
Module-4	
<p>7. One - point perspective drawings: Exercises of perspective drawings of simple built forms, interior views of a room with furniture. Exercise of perspective by changing the variables, their positions of PP, CV, SP and eye level etc.</p> <p>8. Two-point perspective drawings: exercises of perspective drawings of simple built forms, architectural elements. Interior views of a room with furniture. Exercises of perspective by changing the variables, their positions of PP, CV, SP and eye-level etc.</p>	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. The students need to do the discussions on assignments in the studios. 2. Explore videos in various websites using animation of geometrical drawings. <p>A consolidated portfolio containing exercises related to each of the above topics are to be submitted for term work examination.</p>
Module-5	
<p>9. Free-hand perspective drawings of architectural elements, built forms. Exercises of rendering techniques showing light, shade and shadow on built forms. Rendering of plants, trees, water, landscape, human figures, vehicles, furniture and buildings with suitable elements of foreground and background.</p> <p>10. Introduction to Sciography: Principles of shade and shadow constructions for geometrical solids, architectural elements and built forms. Construction of shadows on floor plans, elevations, sectional elevations and roof-top views.</p>	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. The students need to do the discussions on assignments in the studios. 2. Explore videos in various websites using animation of geometrical drawings. <p>A consolidated portfolio containing exercises related to each of the above topics are to be submitted for term work examination.</p>
Course outcome (Course Skill Set)	
At the end of the course, the students will be equipped with a skills to use 3D techniques in architectural presentations. They would also attain skills to make architectural presentation using rendering and sciographic techniques.	

Assessment Details (both CIE and SEE)

(methods of CIE need to be define topic wise i.e.- Submission of construction drawing sheets, Journal of materials, Multiple Choice Question, Quizzes, Open book test, Seminar or micro project)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 50% marks individually both in CIE and 40% marks in SEE to pass. The average score of CIE + SEE shall be not less than 50% maximum marks of the course. Semester End Exam (SEE) is conducted for 50 marks (Term work). Based on this grading will be awarded.

Continuous Internal Evaluation:

5. Methods suggested: Submission of drawings done in studio, assignment sheets, etc., to be evaluated on weekly basis.
6. The class teacher has to decide the topics for the test. In the beginning only the teacher has to announce the methods of CIE for the subject.

Semester End Examination:

7. The student need to submit his/her works done throughout the semester, including rough sheets for Term work examination, atleast one day prior to Term work examination to the course teacher/coordinator.
8. The work will be evaluated by an external teacher appointed by the University along with Course teacher or an internal examiner.
9. The SEE mark list generated is to be signed by both internal and external examiners and submitted to VTU in sealed cover through the Principal of the institution.

Suggested Learning Resources:**Books**

- 1) Francis D.K.Ching, "Architectural Graphics", Van Nostrand Reinhold Co., 1985
- 2) I.H.Morris, " Geometrical Drawing for Art Students", Longmans (1902)
- 3) Robert.W.Gill, "Rendering with pen and ink".
- 4) Shankar Malik, " Perspective & Sciography", 1994, Allied Publisher

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Encourage students to work on Computer aided Graphics.
-

II Semester

History of Architecture-II			
Course Code	21ARC24	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	3	Exam Hours	3
Course objectives: <i>To provide an understanding of the evolution of Hindu Architecture in India in its various stylistic modes, characterized by technology, ornamentation and planning practices.</i>			
Teaching-Learning Process (General Instructions) These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes. 1) Use of theory, activities, sketches, drawings, assignment and tutorial for teaching. 2) Evaluation by quiz, tests, classroom activities.			
Module-1			
<ol style="list-style-type: none"> 1. Introduction to Classical (Buddhist): Mahayana phase, stupa and rock cut cave Architecture. 2. Buddhist Examples: Study of principles of design of buildings through study of three kinds of Architecture: a) Monumental; Great Stupa at Sanchi, Chaitya at Karli, Viharas at Ajanta, and Toranas at Sanchi b) Domestic (Built to inhabit) and c) Civic space. 3. Introduction to Jain Architecture: Study of principles of design of buildings through study of three kinds of Architecture: a) Monumental; b) Domestic (Built to inhabit) and c) Civic space. 			
Teaching-Learning Process	<ol style="list-style-type: none"> 1) The teacher can use PPTs, Videos to discuss the buildings, style of architecture. 2) The students need to sketch the buildings for its unique qualities. 3) Quizzes, models, seminars from students can be encouraged 		
Module-2			
<ol style="list-style-type: none"> 4. Evolution of Hindu temple: Indo Aryan and Dravidian – Early temples at Udaigiri, Tigawa and Sanchi. 5. Evolution of Hindu temple: Dravidian Experiments at Aihole (Durga temple and LadKhan temple), Deogarh, Bhitargaon and Badami. 6. Beginnings of Dravidian architecture: Pallavas, rathas at Mamallapuram, Shore temple, Kailsanatha and Vaikuntaperumal temples at Kancheepuram. 			
Teaching-Learning Process	<ol style="list-style-type: none"> 1) The teacher can use PPTs, Videos to discuss the buildings, style of architecture. 2) The students need to sketch the buildings for its unique qualities. 3) Quizzes, models, seminars from students can be encouraged 		
Module-3			
<ol style="list-style-type: none"> 7. The Cholas contribution: Study of principles of design of buildings through study of three kinds of Architecture: a) Monumental; Brihadeshwara temple at Thanjavur and Gangaikonda Cholapuram b) Domestic (Built to inhabit) and c) Civic space; 8. The Pandyan & Madurai Dynasties contribution: Study of principles of design of buildings through study of three kinds of Architecture: a) Monumental; Gopurams Madurai (Meenakshi 			

temple) and Srirangam. b) Domestic (Built to inhabit) and c) Civic space;	
Teaching-Learning Process	1) The teacher can use PPTs, Videos to discuss the buildings, style of architecture. 2) The students need to sketch the buildings for its unique qualities. 3) Quizzes, models, seminars from students can be encouraged
Module-4	
9. The Hoysala contribution: Study of principles of design of buildings through study of three kinds of Architecture: a) Monumental; Eg: Channakesava temple, Belur, Hoysalesvara temple, Halebid, Kesava temple, Somnathpur b) Domestic (Built to inhabit) and c) Civic space;	
10. Indo Aryan Mode: the beginnings in Orissa – the Lingaraja at Bhubaneshwar.	
Teaching-Learning Process	1) The teacher can use PPTs, Videos to discuss the buildings, style of architecture. 2) The students need to sketch the buildings for its unique qualities. 3) Quizzes, models, seminars from students can be encouraged
Module-5	
11. Hindu architecture at Rajputana & Khajuraho group: (Temple of Surya, Orisa, Marwar) and Gujarat (Temple of Surya, Modhera). The Khajuraho group: Khandariya Mahadev, Jain temples – Chaumukh temple at Ranpur	
12. Later Dravidian period: The Vijayanagar and– Noted temples at Hampi (Vitthala temple and Hazara Rama temple),	
NOTE: Site visit and documentation of a Temple may be made for part assessment of the progressive marks.	
Teaching-Learning Process	1) The teacher can use PPTs, Videos to discuss the buildings, style of architecture. 2) The students need to sketch the buildings for its unique qualities. 3) Quizzes, models, seminars from students can be encouraged
Course outcome (Course Skill Set)	
1) At the end of the course the student will be able to develop appropriate skills of reading, writing and understanding the physical and aesthetic experience of buildings. 2) The students will be able to appreciate	

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks (50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 40% (20 Marks out of 50)in the semester-end examination(SEE), and a minimum of 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

Continuous Internal Evaluation:

Three Unit Tests each of **20 Marks (duration 01 hour)**

7. First test at the end of 5th week of the semester
8. Second test at the end of the 10th week of the semester
9. Third test at the end of the 15th week of the semester

Two assignments each of **10 Marks**

10. First assignment at the end of 4th week of the semester
11. Second assignment at the end of 9th week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

12. At the end of the 13th week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

3. The question paper will have ten questions. Each question is set for 20 marks.
4. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module..

Theory paper will be out of 100 marks and will be **scaled down to 50 marks.**

Suggested Learning Resources:**Books**

1. Bannister Fletcher , "History of Architecture", CBS Publishers, 1992
2. "Indian Architecture, Buddhist and Hindu Period" by Brown, Percy
3. "Architecture of India – Buddhist and Hindu" by Grover Satish

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Making sketches of various buildings in sketch book
- Seminar by students on selected topics in group or individually.
- Group discussion on a topic.
- Measured drawing of a monument in the nearby area.

II Semester

BASIC DESIGN AND THEORY OF DESIGN			
Course Code	21ARC25	CIE Marks	50
Teaching Hours/Week (L:T:S: P)	2:0:2:0	SEE Marks(viva)	50
Exam Hours	Internals	Total Marks	100
Credits	04		
Course objectives: .OBJECTIVE: To encourage Visual creative thinking and critical orientation to design thinking and action.			
Teaching-Learning Process (General Instructions) These are sample Stress-free exercises which teachers can use to accelerate the attainment of the various course outcomes. <ol style="list-style-type: none"> 9. Show Video/Power point presentation to explain concepts 10. Encourage hands on practical experimentation of different ways of composition. 11. Creative Visual thinking exercise by using Elements and Principles of design. 12. Adopt multidisciplinary collaboration to understand the fundamentals of all art forms. 13. Concepts will be introduced in multiple representations to abstraction. 14. Show different ways of dealing with same exercise by exposing them to various mediums. 15. Expose students to different exhibitions and performing art . <p>Study to develop hand & cognitive skill.</p>			
Module-1MODULE-1: Definition of Art and role of Art in Society: Role and meaning of art, various types of arts-fine arts, performing arts, commercial arts, industrial arts, folk arts, abstract art, visual arts, spatial arts, temporal arts, pop art etc., relationship of architecture with other arts like Painting and Sculpture. Study Tools- Any three in all the above art forms can be explored by students under the following heads: <ul style="list-style-type: none"> • Observation & Study to develop hand & cognitive skill. • Colours, Pattern & textures, and function • Additive and Subtractive of Forms • Freehand sketching • Exercises of rendering techniques 			
Introduction to Different forms of Art <ul style="list-style-type: none"> • What is art and its role in society? • Which are the different forms of art? • What is a work of art and how it's related to other forms of art? 			
Teaching-Learning Process	<ul style="list-style-type: none"> • Documentation any one art form from India • To observe and understand different elements and principled involved in making that art form. • Observing and documenting various skill set needed to execute that art form or the craftsmanship required to make that work of art. • Understand the creative process and use the understanding in a composition. 		
Module-2			

<ol style="list-style-type: none"> 1. Principles of Aesthetics and Architectural Composition 2. Contrast, harmony, accentuation, restraint in Architectural composition. Illustrations and its application to the practice of design in historical as well as contemporary building. 3. Repose, vitality, strength in Architectural composition. 4. Principles of Aesthetics and Architectural Composition 	
Teaching-Learning Process	<ul style="list-style-type: none"> • Intangible to tangible analysis by taking our classical music composition to 3d composition using the grammar of music which are present in Principles of art and design. • Understanding the commonalities between the performing art ,Visual art and their compositions. • To learn basic design principles such as balance, symmetry, rhythm, repetition, hierarchy, unity, proportion, emphasis, contrast
Module-3	
Spatial organizations of Masses in Architecture	
<p>1: linear, radial, grid organization. Illustrations of linear, radial, grid organization in spatial organizations of masses in Architecture and its application to the practice of design with both historical as well as contemporary buildings.</p> <p>Study Tools-</p> <p>Process of Representation of natural pattern to abstraction using pure geometrical/dimensional form using various visual media. Eg. Charcoal/ pencil/crayons/oils etc.</p> <p>Use of 2D & 3D hands on working models to synthesize and create form to appreciate the difference between architecture and spatial organizations.</p>	
Teaching-Learning Process	<ul style="list-style-type: none"> • Understanding the difference and similarity while design of a non-enclosed space, a semi-enclosed space, an enclosed space. • Analysis of spaces using – Form, colour, texture, light, ventilation, space and scale along with circulation. • Submission will include Idea generation, Study models, Sketches and drawings to achieve the desired results. • Drawings of the human body in various postures with required measurements • Study Tools- Any three can be explored • • : Observation & Study to develop hand & cognitive skill. • : Colours, Pattern & textures, and function • : Additive and Subtractive of Forms • : Freehand sketching • : Exercises of rendering techniques
Module-4	
Introduction to Abstraction:	
<ol style="list-style-type: none"> 2. Ornamentation in Architecture: Historical perspective of the use of ornament in buildings and use of ornament as a decoration to embellish parts of a building. Use and need of ornament in architectural design – different types of ornamentation in buildings. 3. Ornamentation in Architecture Criticism–Argument against ornamentation. Ideas of architect Adolf Loos (Ornament and Crime); Ornaments as economically inefficient and morally degenerate, reduction of ornament or lack of decoration as the sign of an advanced society. <p>Study Tools- Structural/Material translation from concept and architectural form.</p>	
Teaching-Learning Process	<ul style="list-style-type: none"> • Exercises to introduce 2D concepts to 3D forms without functional constraints and Human scale. • Declaring the conceptual theme of any composition at the beginning, before the exploring the volume using Horizontal and vertical elements or planes. • Study of patterns and use the pattern, both physical and material patterns as well

	as patterns of transformation and Integration. Appreciation of the difference between architecture and the chosen pattern.
Module-5	
<p>Style in art & Architecture: Basis for classification of styles including chronology of styles arrangement according to order that changes over time.</p> <p>Evolution of styles; reflecting the emergence of new ideas as reaction to earlier styles as a result of changing of fashions, beliefs, technology etc. Popular and modern art, Art trends, periods and Isms.</p> <p>Study Tools-</p> <ul style="list-style-type: none"> • : Material Study • : Experience of architecture in basic psychological and physiological terms 	
Teaching-Learning Process	<ul style="list-style-type: none"> • Understanding the difference and similarities while the design of a non-enclosed space, a semi-enclosed space, an enclosed space. • Submission will include Idea generation, Study models, Sketches, and drawings to achieve the desired results.
<p>Course outcome (Course Skill Set)</p> <p>At the end of the course the student will be able to:</p> <ul style="list-style-type: none"> • Differentiate between Art and craft and how these are related to Architecture • Study to develop hand & cognitive skill. 	
Note	<ul style="list-style-type: none"> • Discussions, presentations, Study models, case studies & Activities will be part of the studio work. • The portfolio covering all the progressive and final works shall be presented for Viva.
<p>Assessment Details (both CIE and SEE)</p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 50% of maximum marks in CIE and 40% of maximum marks in SEE to pass. In aggregate CIE+SEE student has to score 50% of maximum marks. Semester End Exam (SEE)Viva is conducted for 50 marks. Based on this grading will be awarded.</p> <p>Continuous Internal Evaluation:</p> <ol style="list-style-type: none"> 5. Methods suggested: Presentation, Progressive Portfolio submissions & Discussions etc. 6. In the beginning only, the teacher has to announce the methods of CIE for the subject. <p>Semester End Examination:</p> <ol style="list-style-type: none"> 6. Viva SEE will be conducted by University as per the scheduled timetable, with External examiners. 7. Assessment will be based on Portfolio works submission, communication skills, understanding of the subject, Creative ability and overall Presentation. 	
<p>Suggested Learning Resources:</p> <p>REFERENCES:</p> <ol style="list-style-type: none"> 1. Form, Space and Order” by Francis DK Ching 2. Design Fundamentals in Architecture” by Parmar VS 3. Theory of Architecture by Paul Alan Johnson <p>4. Creating Architectural Theory by John Lang</p>

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Documenting/ sketches of various arts & crafts in the region
- Seminar by students on selected topics in group or individually.
- Group discussion on a topic.

II Semester

Building Structure - I			
Course Code	21ENG26	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	3	Exam Hours	3
Course objectives: <i>Introduction to principles of mechanics, structural material & different force system & on structural properties.</i>			
Teaching-Learning Process (General Instructions) These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
Module-1			
Different construction materials with emphasis on structural properties viz. steel , concrete, wood, glass, aluminium. Different types of loads, the structure is being subjected to as per IS 875 Part I & II.			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Theory classes to evaluate the structural properties of materials. 2. Specifications and applications as per IS Codes. 3. Documenting of learning through sketches, notes, assignments. 		
Module-2			
Mechanics - Classification of mechanics, force, characteristics of force, classification of force system, Resultant of force, Composition of force, Axioms in mechanics, Principles of transmissibility, Moment of force, Resultant of coplanar concurrent force system, and Free body diagrams.			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Theory classes to evaluate the Basics of Mechanics. 2. Documenting of learning through sketches, notes, assignments. 		
Module-3			
Resultant of coplanar noncurrent force system, couple & characteristics of couple, different types of loads, different types of beams, statically determinate & statically indeterminate, different types of supports, problems on support reactions, Equilibrium of Co-planar Concurrent and Non-Concurrent forces. Note: In the numerical pertaining to support reactions, loading on the beam shall be restricted to only <u>point load & uniformly distributed load</u>].			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Theory classes to evaluate the forces of structural systems in Buildings. 2. Documenting of learning through sketches, notes, assignments. 		
Module-4			
Center of gravity, centroid, to locate the centroid of composite section from the 1st principles. Moment of inertia, radius of gyration, parallel axis theorem, perpendicular axis theorem. Numericals on determination of moment of inertia of composite section about any defined axis.			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Theory classes to evaluate the moments Building System. 2. Documenting of learning through sketches, notes, assignments. 		
Module-5			
Truss - Triangulation concept, different types of trusses, assumption made in the analysis of truss. Analysis of the truss by the " Method of Joints " (Simple problems) to calculate the dead weight of the truss from given data.			

Teaching-Learning Process	<ol style="list-style-type: none"> 1. Theory classes to evaluate the forces of structural systems in a typical truss. 2. Documenting of learning through sketches, notes, assignments.
<p>Course outcome (Course Skill Set) At the end of the course the students will have the ability to understand the mechanics of forces acting on rigid bodies and the structural properties.</p>	
<p>Assessment Details (both CIE and SEE) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks (50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 40% (20 Marks out of 50)in the semester-end examination(SEE), and a minimum of 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p> <p>Continuous Internal Evaluation: Three Unit Tests each of 20 Marks (duration 01 hour)</p> <ol style="list-style-type: none"> 13. First test at the end of 5th week of the semester 14. Second test at the end of the 10th week of the semester 15. Third test at the end of the 15th week of the semester <p>Two assignments each of 10 Marks</p> <ol style="list-style-type: none"> 16. First assignment at the end of 4th week of the semester 17. Second assignment at the end of 9th week of the semester <p>Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for 20 Marks (duration 01 hours)</p> <ol style="list-style-type: none"> 18. At the end of the 13th week of the semester <p>The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be scaled down to 50 marks (to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course). CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</p> <p>Semester End Examination: Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (duration 03 hours)</p> <ol style="list-style-type: none"> 5. The question paper will have ten questions. Each question is set for 20 marks. 6. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), should have a mix of topics under that module. <p>The students have to answer 5 full questions, selecting one full question from each module Theory paper will be out of 100 marks and will be scaled down to 50 marks.</p>	
<p>Suggested Learning Resources:</p> <p>Books</p> <ol style="list-style-type: none"> 1) R.K.Bansal, " A Textbook of Engineering Mechanics", Laxmi Publications, 2008 2) S.S. Bhavikatti, " Engineering Mechanics", New Age International, 1994. 3) S. Ramamrutham, "Engineering Mechanics ", Dhanpat Rai Publishing, New Delhi, 2016. 	
<p>Web links and Video Lectures (e-Resources):</p>	

1. <https://ndl.iitkgp.ac.in>
2. <https://www.youtube.com/watch?v=CcHPzDPYkho>
3. https://www.youtube.com/watch?v=Hn_iozUo9m4
4. https://www.youtube.com/channel/UCXAS_Ekkq0iFJ9dSUIkcAkw

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Visit to Construction yard/site to understand uses of building materials in a structure.
- Hands on experience in testing of various building materials
- Visit to large span truss buildings to understand the details of a truss.
- Watching animated videos on structural systems

II Semester

Site Surveying and Analysis			
Course Code	21ENG27	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks(Term Work)	50
Total Hours of Pedagogy	25	Total Marks	100
Credits	2	Exam Hours	-
Course objectives:			
<i>To develop the knowledge and skills related to surveying and levelling principles and practice and carrying out surveys of land of medium complexity and preparation of survey plans.</i>			
Teaching-Learning Process (General Instructions)			
These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.			
Module-1			
1) Introduction to Surveying – Definition, classification, principles of surveying, character of work, shrunk scale.			
2) Introduction to Chain Surveying Instruments – Chain and its types, Ranging Rod, Tapes, pegs.			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Practical classes to evaluate the principles of surveying. 2. Documenting of learning through sketches, notes, assignments. 		
Module-2			
3) Chain Surveying 1 – Ranging and Types of Ranging.			
4) Chain Surveying 2 – Setting out angles, erecting perpendicular, Obstacles in chain surveying, calculation of area by offsets.			
Plane Table Surveying – Accessories used advantages and disadvantages, Methods of plane table surveying (radiation and intersection).			
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Practicals to demonstrate the using of survey equipments and methods of surveying. 2. Students to document learning through exercises, notes, assignments. 		
Module-3			

5) Levelling - Definition, Classification, booking and reduction of levels (HI Method, Rise and Fall Method).	
6) Levelling - Profile levelling - Calculation of depth of cutting and filling	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Practicals to demonstrate the using of survey equipments and methods of surveying. 2. Students to document learning through exercises, notes, assignments.
Module-4	
7) Contouring : Characteristics of contours, direct and indirect methods of contours, interpolation and uses of contours.	
8) Introduction to Contemporary Survey Instruments - Theodolite, Total Station, GPS Theodolite - Basic Concepts, Measuring horizontal and vertical angles Total Station - Accessories used, uses of total station and applications, Introduction to GPS	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Practicals to demonstrate the using of survey equipments and methods of surveying. 2. Students to document learning through exercises, notes, assignments.
Module-5	
9) Observation and Analysis of a Site - Survey without instruments using geometry and anthropometric measures. To learn a terrain on site factors like topography, hydrology, soils, landforms, vegetation, climate and micro climate and influence of water bodies.	
10) Studying Survey Drawing - Learning to read a land survey drawing, types of land survey drawing, scale and north, legends and symbols.	
Teaching-Learning Process	<ol style="list-style-type: none"> 1. Students to document field learning through notes, sketches, and assignments.
Course outcome (Course Skill Set)	
At the end of the course the students will have ability to understand measure and analyze the topographical characteristics of a given site for its effective use in site planning.	

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks (50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 40% (20 Marks out of 50)in the semester-end examination(SEE), and a minimum of 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

Continuous Internal Evaluation:

1. Methods suggested: Submission of drawings done in field survey, assignment sheets, journal writing, etc., to be evaluated on weekly basis.
2. The class teacher has to decide the topics for the test. In the beginning only the teacher has to announce the methods of CIE for the subject.

Semester End Examination:

1. The student need to submit his/her works done throughout the semester, including rough sheets for Term work examination, atleast one day prior to Term work examination to the course teacher/coordinator.
2. The work will be evaluated by an external teacher appointed by the University along with Course teacher or an internal examiner.
3. The SEE mark list generated is to be signed by both internal and external examiners and submitted to VTU in sealed cover through the Principal of the institution.

Suggested Learning Resources:**Books**

- 1) B C Punmia, " Surveying Volume I", Firewall Media, 2005
- 2) K R Arora,"Surveying " Standard Book House,7th edition.
- 3) R. Subramanian, " Fundamentals of Surveying and Levelling", Oxford Uni. Press., 2014.
- 4) S K Duggal," Surveying", Vol 1, 14th Edition, McGraw Hill Education, 2013.
- 5) TP Kanetkar, SV Kulkarni, "Surveying and Levelling(Part-1)", PuneVidyarthi Griha Prakashan, 2014.

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Use of modern tools and technology in surveying to be encouraged.

II Semester**Professional Writing Skills in English**

Course Code	21EGH28	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	1:1:1	SEE Marks	50
Total Hours of Pedagogy	03 Hours/Week	Total Marks	100
Credits	02	Exam Hours	2 hour

Course objectives:

The course (21EGH28) will enable the students ,

- To Identify the Common Errors in Writing and Speaking of English.
- To Achieve better Technical writing and Presentation skills for employment.
- To read Technical proposals properly and make them to Write good technical reports.
- Acquire Employment and Workplace communication skills.
- To learn about Techniques of Information Transfer through presentation in different level.

Language Lab : To augment LSRW, grammar and Vocabulary skills (Listening, Speaking, Reading,

Writing and Grammar, Vocabulary) through tests, activities, exercises etc., comprehensive web-based learning and assessment systems can be referred as per the AICTE /VTU guidelines.

Teaching-Learning Process (General Instructions)

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.

- ✓ Teachers shall adopt suitable pedagogy for effective teaching - learning process. The pedagogy shall involve the combination of different methodologies which suit modern technological tools and software's to meet the present requirements of the Global employment market.
 - (i) Direct instructional method (Low /Old Technology),
 - (ii) Flipped classrooms (High/advanced Technological tools),
 - (iii) Blended learning (combination of both),
 - (iv) Enquiry and evaluation based learning,
 - (v) Personalized learning,
 - (vi) Problems based learning through discussion,
 - (vii) Following the method of expeditionary learning Tools and techniques,
 - (viii) Use of audio visual methods through language Labs in teaching of of LSRW skills.
- ✓ Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students In theoretical applied and practical skills in teaching of communicative skills in general.

Module-1**Identifying Common Errors in Writing and Speaking English :**

- Advanced English Grammar for Professionals with exercises, Common errors identification in parts of speech, Use of verbs and phrasal verbs, Auxiliary verbs and their forms, Subject Verb Agreement (Concord Rules with Exercises).
- Common errors in Subject-verb agreement, Noun-pronoun agreement, Sequence of Tenses and errors identification in Tenses. Advanced English Vocabulary and its types with exercises – Verbal Analogies, Words Confused/Misused.

Teaching-Learning Process	Chalk and talk method, PowerPoint presentation to teach Communication skills (LSRW Skills), Creating real time stations in classroom discussions, Giving activities and assignments (Connecting Campus & community with companies real time situations).
----------------------------------	--

Module-2	
<u>Nature and Style of sensible writing :</u>	
<ul style="list-style-type: none"> Organizing Principles of Paragraphs in Documents, Writing Introduction and Conclusion, Importance of Proper Punctuation, The Art of Condensation (Precise writing) and Techniques in Essay writing, Common Errors due to Indianism in English Communication, Creating Coherence and Cohesion, Sentence arrangements exercises, Practice of Sentence Corrections activities .Importance of Summarising and Paraphrasing. Misplaced modifiers, Contractions, Collocations, Word Order, Errors due to the Confusion of words, Common errors in the use of Idioms and phrases, Gender, Singular & Plural. Redundancies & Clichés. 	
Teaching-Learning Process	Chalk and talk method, PowerPoint presentation and Animation videos to teach phonetics in Practical method, creating real time stations in classroom discussions, Giving activities and assignments (Connecting Campus & community with companies real time situations).
Module-3	
<u>Technical Reading and Writing Practices :</u>	
<ul style="list-style-type: none"> Reading Process and Reading Strategies, Introduction to Technical writing process, Understanding of writing process, Effective Technical Reading and Writing Practices, Introduction to Technical Reports writing, Significance of Reports, Types of Reports. Introduction to Technical Proposals Writing, Types of Technical Proposals, Characteristics of Technical Proposals. Scientific Writing Process. Grammar – Voice and Speech (Active and Passive Voices) and Reported Speech, Spotting Error Exercises, Sentence Improvement Exercises, Cloze Test and Theme Detection Exercises. 	
Teaching-Learning Process	Chalk and talk method, PowerPoint presentation to teach Grammar, Animation videos on communication and language skills, creating real time stations in classroom discussions, Giving activities and assignments (Connecting Campus & community with companies real time situations).
Module-4	
<u>Professional Communication for Employment :</u>	
<ul style="list-style-type: none"> The Listening Comprehension, Importance of Listening Comprehension, Types of Listening, Understanding and Interpreting, Listening Barriers, Improving Listening Skills. Attributes of a good and poor listener. Reading Skills and Reading Comprehension, Active and Passive Reading, Tips for effective reading. Preparing for Job Application, Components of a Formal Letter, Formats and Types of official, employment, Business Letters, Resume vs Bio Data, Profile, CV and others, Types of resume, Writing effective resume for employment, Model Letter of Application (Cover Letter) with Resume, Emails, Blog Writing, Memos (Types of Memos) and other recent communication types. 	
Teaching-Learning Process	Chalk and talk method, PowerPoint presentation to teach Grammar and phonetics, Animation videos on communication and language skills, creating real time stations in classroom discussions, Giving activities and assignments (Connecting Campus & community with companies real time situations).
Module-5	
<u>Professional Communication at Workplace:</u>	
<ul style="list-style-type: none"> Group Discussions – Importance, Characteristics, Strategies of a Group Discussions. Group Discussions is a Tool for Selection. Employment/ Job Interviews - Importance, Characteristics, Strategies of a Employment/ Job Interviews. Intra and Interpersonal Communication Skills - Importance, Characteristics, Strategies of an Intra and Interpersonal Communication Skills. Non-Verbal Communication Skills (Body Language) and its importance in GD and PI/JI/EI. Presentation skills and Formal Presentations by Students - Importance, Characteristics, Strategies of Presentation Skills. Dialogues in Various Situations (Activity based Practical 	

Sessions in class by Students).	
Teaching-Learning Process	Chalk and talk method, Power Point presentation to teach Grammar and phonetics, Animation videos on communication and language skills, creating real time stations in classroom discussions, Giving activities and assignments (Connecting Campus & community with companies real time situations).
<p>Course outcome (Course Skill Set)</p> <p>At the end of the course(21EGH28) the student will be able :</p> <ol style="list-style-type: none"> 1. To understand and identify the Common Errors in Writing and Speaking. 2. To Achieve better Technical writing and Presentation skills. 3. To read Technical proposals properly and make them to Write good technical reports. 4. Acquire Employment and Workplace communication skills. 5. To learn about Techniques of Information Transfer through presentation in different level. 	

Assessment Details (both CIE and SEE)

Continuous internal evaluation (CIE) needs to be conducted for 50 marks like Engineering courses. The weight age of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 50% of maximum marks in CIE and 40% of maximum marks in SEE to pass. MCQ Pattern (Multiple Choice Questions) Semester End Exam (SEE) is conducted for 50 marks (120 minutes duration). Based on this grading will be awarded. The student has to secure 50% marks of the course (CIE+SEE).

Continuous Internal Evaluation (CIE) :

Three Unit Tests each of **20 Marks (duration 01 hour)**

13. First test at the end of 5th week of the semester
14. Second test at the end of the 10th week of the semester
15. Third test at the end of the 15th week of the semester

All the tests are preferred similar to SEE pattern; however, the teacher may follow test pattern similar to other theory courses of Engineering

Two assignments each of **10 Marks**

1. First assignment at the end of 4th week of the semester
2. Second assignment at the end of 9th week of the semester
3. Report writing /Group discussion/Seminar any one of three suitably planned to attain the COs and POs for **20 Marks(duration 01 hours)**
4. At the end of the 13th week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination (SEE) :

SEE paper will be set for 100 questions of each of 01 mark. The pattern of the question paper is MCQ. The time allotted for SEE is 120 minutes. Marks scored are scaled down to 50 Marks. *(Time duration may be made 90 minutes to train the students for engineering / non-engineering competitive examination)*

3. Professional Writing Skills in English has become a very important component in all engineering and non-engineering competitive examinations. In exams like GRE, TOEFL, IELTS and GATE exam, all state and Central Government recruitment examinations, placement tests and other Examinations, so the pattern of question paper, in general, will be in multiple-choice question (MCQ) Pattern. So, to meet the relevance of the recruitment requirement of our Engineering students "Professional writing skill in English" Semester end examination (SEE) will be conducted in a multiple choice question (MCQ) pattern.
4. MCQ Pattern (Multiple Choice Questions) Semester End Exam (SEE) is conducted for 50 marks (120 minutes duration).

Teaching-Learning Process	Chalk and talk method, PowerPoint presentation and YouTube videos, Animation videos methods. Creating real time stations in classroom discussions. Giving activities & assignments.

Course outcome (Course Skill Set)

At the end of the course the student will be able :

CO 1: To understand Health and wellness (and its Beliefs)

CO 2: To acquire Good Health & It's balance for positive mindset

CO 3: To inculcate and develop the healthy lifestyle habits for good health.

CO 4: To Create of Healthy and caring relationships to meet the requirements of MNC and LPG world

CO 5: To adopt the innovative & positive methods to avoid risks from harmful habits in their campus & outside the campus.

CO 6: To positively fight against harmful diseases for good health through positive mindset.

Assessment Details (both CIE and SEE)

(methods of CIE need to be defined topic wise i.e.- Tests, MCQ, Quizzes, Seminar or micro project/Course Project, Term Paper)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The student has to obtain a minimum of 40% of maximum marks in SEE and a minimum of 50% of maximum marks in CIE. Semester End Exam (SEE) is conducted for 50 marks (hours' duration). Based on this grading will be awarded.

The student has to score a minimum of 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

Three Unit Tests each of **20 Marks (duration 01 hour)**

16. First test at the end of 5th week of the semester

17. Second test at the end of the 10th week of the semester

18. Third test at the end of the 15th week of the semester

(All tests are similar to the SEE pattern i.e question paper pattern is MCQ)

Two assignments each of **10 Marks**

19. First assignment at the end of 4th week of the semester

20. Second assignment at the end of 9th week of the semester

Report writing /Group discussion/Seminar any one of three suitably planned to attain the COs and POs for **20 Marks(duration 01 hours)**

21. At the end of the 13th week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for subject

SEE paper will be set for 50 questions of each of 01 mark. The pattern of the question paper is MCQ. The time allotted for SEE is **01 hour**.

Suggested Learning Resources:

1. **Health Psychology** (Second edition) by Charles Abraham, Mark Conner, Fiona Jones and Daryl O'Connor – Published by Routledge 711 Third Avenue, New York, NY 10017.
2. **Health Psychology - A Textbook**, FOURTH EDITION by Jane Ogden McGraw Hill Education (India) Private Limited - Open University Press
3. **HEALTH PSYCHOLOGY (Ninth Edition)** by SHELLEY E. TAYLOR - University of California, Los Angeles, McGraw Hill Education (India) Private Limited - Open University Press
4. **Scientific Foundations of Health (Health & Wellness) - General Books** published for university and colleges references by popular authors and published by the reputed publisher.
- 9) **SWAYAM / NPTL/ MOOCS/ We blinks/ Internet sources/ YouTube videos** and other materials / notes

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- ✓ Contents related activities (Activity-based discussions)
- ✓ For active participation of students, instruct the students to prepare Flowcharts and Handouts
- ✓ Organizing Group wise discussions and Health issues based activities
- ✓ Quizzes and Discussions
- ✓ Seminars and assignments
